

Why Robotic Sushi?

Traditional Style

Our Sushi Conveyor Systems have been installed in North America, South-East Asia, Russia, Europe and other regions around the world.

We consult from designing stage to delivery of sushi conveyor, to satisfy the exact needs of our customers to assist in the success of their sushi business.

Customers can select either Traditional or Modern Style that is cost effective, with highly customisable features. Please read below to find out the special features of our Sushi Conveyor.

Robotic Sushi's traditional sushi conveyor utilise a chain-belt design with highly customisable acrylic conveyor tops. The Traditional Style is most widely used amongst Australian Sushi Kiosks and restaurants.

Following lists are summary of Robotic Sushi's Sushi Conveyor features:

1. *Half Length Type or Full Length Type,*
2. *500mm Conveyor Width, but adjustable.*
3. *Tension Adjustment in the Conveyor Belts*

As the conveyor belts de-grade over time, it causes links to stretch but tension adjustment function allows smooth operation of conveyor belt, allowing longer life-span of conveyor system.

4. Customisable Acrylic Conveyor Belt Top Plates

a. Acrylic top can be customised to different colours and designs.

Colours include red, pink, orange, yellow, blue, purple, white, brown, green and more.

Logo Stickers can be placed on the top plates to empower your sushi brand.

5. Stainless Steel Frame and Aluminium Profile Legs (Option: Bench Railing)

Our Sushi Conveyor is custom-built using laser cutters in our dedicated facilities in Taiwan or Singapore, to suit our customers' needs and shop layouts. That means, our customers can come to Robotic Sushi with any design and concept in mind and we can custom-build the Sushi Conveyor of your mind.

Also, since the Sushi Conveyor is designed with a stainless steel frame and aluminium profile legs, our customers can request their dedicated shop fitters or our recommended shop fitters to create custom bench table top and coverings to place the Sushi Conveyor on top*.

* Please note that the Sushi Conveyor can be purchased separately without the aluminium legs to replace an old or malfunctioning Sushi Conveyor.

** Please note that design to manufacturing to delivery process can take up to 4 weeks and it is subjected to any design changes made during the progress.

Modern Style

Our Modern Style Sushi Conveyor System does not require any coverings or profile legs providing space-saving solution with comfortable spaces for customers. It has been immensely popular for customers in Europe but it has a huge potential for Australian Sushi Kiosks and Restaurants.

Similar to our Standard Style, the Modern Style Sushi Conveyor is highly customisable and made to order. Also, the surface of the counters can be stainless steel, plywood or marble finish. Since it doesn't need side panels and footrests, our Modern Style costs less than the Standard Style.
